DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 21 is rejected under 35 U.S.C. 102(e) as being anticipated by Fatehi (U.S. Patent No. 6,600,581).

Regarding claim 21, Fatehi teaches an extraction unit (reference numeral 211 in Figure 2) extracting the identifier (e.g. “tag” throughout) stored in a predetermined position in each of a plurality of wavelength components; a determination unit (reference numeral 620 in Figure 6) determining whether or not said identifier stored in a predetermined position in each of the plurality of wavelengths components is normal; and judgment unit (reference numerals 625, 630, 635, 640 in Figure 6) judging whether or not each of the plurality of wavelength components in an optical signal is down and whether said identifier is abnormal for each of said wavelength components, based on a detection result output by the determination unit associated with each of the wavelength components (reference numeral 620 in Figure 6), wherein each identifier identifies a channel associated with each of the wavelength components and is uniquely determined by the channel (as indicated in Figures 3A-3C, Figure 4).

Allowable Subject Matter

3. Claims 1-3, 8-13, 18, and 20 are allowed. The applicant is reminded that claims 4-7, 14-17, and 19 remain pending in the case, but are withdrawn as being directed to a non-elected invention.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
